

PHRYGIOS[®]

360 TOWER ATC
SIMULATOR

PHRYGIOS[®] tower simulation software is realistic Air Traffic Controller with Ground Movement Radar, Radar Approach, VCCS, and data information.

3D airport and aircraft by image generator software produce real experience panoramic ATC towers with movement vehicle and wheater.

Scenario of Flight plan, number of aircraft, traffic load, wheater, communication suitable for advance, rating, and refreshment training of ATC.

PHRYGIOS[®]

360 TOWER ATC SIMULATOR

REAL OF TOWER AND RADAR
AIR TRAFFIC CONTROL SIMULATOR

Realistic of Tower ATC Controller
 Pseudo Pilot with AWOS,
 Emergency Crisis Airport, VCCS,
 and Radar integration.
 Best Experience of ATC
 With valuable and best Price

Tower ATC Realistic

- Tower and ground controller
- Radar APP controller simulation
- OJT, Advance and Rating training
- Conversion and refresher training
- Competency checking
- Integrated tower and radar training
- Design, testing, and evaluation tasks

Key Feature

- Realistic 3D Airport and aircraft movement
- Day, night, rain, visibility, and weather scenario
- Automatic for lighting control, tower radars, VCCS Communication
- Emergency Crisis Airport for crash, fire, and fire fighter simulation
- Civil and military aircraft support

- Multiple Pseudo Pilot handling aircraft and powerful visual imaging aircraft
- Eye points plus views from aircraft and other sector airport
- Flight Plan input and scenario local procedures
- VCCS Communication by touch screen realistic Push to Talk
- Recording and Replay for evaluation
- Electronic Strip Printer for Non radar simulation
- Radar APP monitor for advance scenario
- Ground Movement for Runway, Taxing, Apron for simulation aircraft movement
- Upgradable Airport, Aircraft, and AIP requirement
- Instructor Manager for delivery scenario flight plan, number of aircraft, traffic, AWOS, and special simulation
- Multi Choice for budget and requirement
- Full support maintenance, integration and training
